Overview

Introduce the RabbitMQ platform

Compare RabbitMQ to MSMQ on Windows

RabbitMQ demonstration

HabbitMQ

www.rabbitmq.com

Reliability

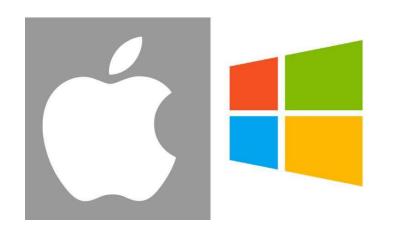

Routing

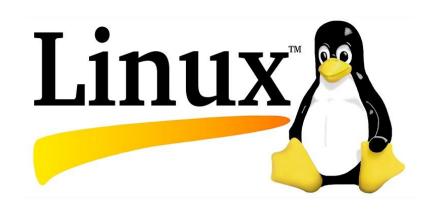

Clustering and High Availability

Management Web Interface

Command Line Interface

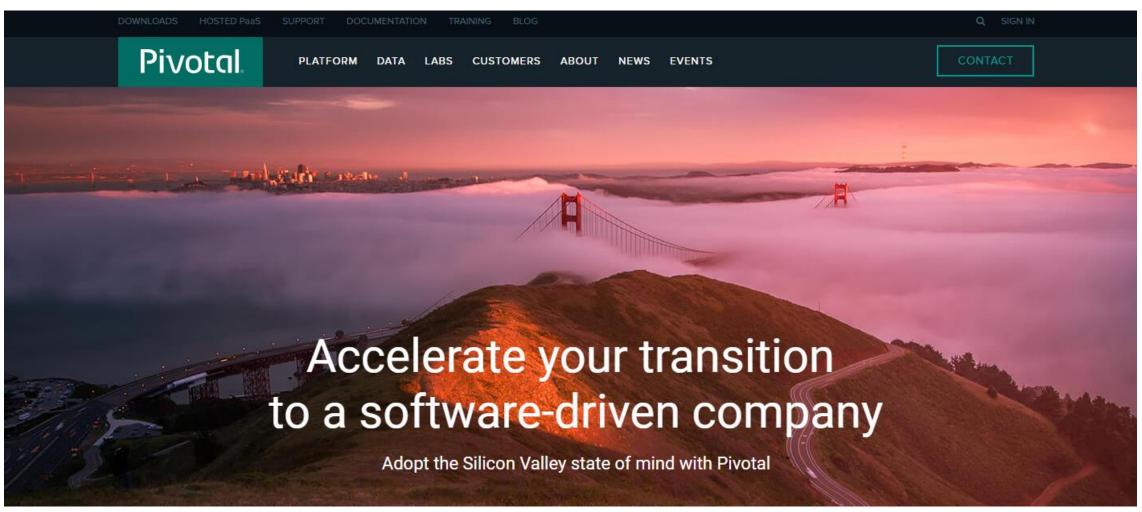

http://pivotal.io

MSMQ

Message Queue Message 1 **Sending Application Receiving Application** Message 2 Remove Message 3 Prepare message message from queue Write to the **Process** queue message Message N

RabbitMQ vs MSMQ

Centralized vs Decentralized Multi-Platform vs Windows Only Standards Based vs No Standards

RabbitMQ Demonstration

RabbitMQ Management Portal Overview

Declare, list, and delete RabbitMQ entities

Queue and exchange monitoring

Send and receive messages

Monitor Erlang processes, file descriptors, and memory use

Force close connections, and purge queues

Summary
